

**NEW** **YAG** SERIES

REFRIComP refrigeration components		C E0408
OIL SEPARATOR		
Type	YAG 11	PS: 33 Bar
Code	Y05-0900-2	Tb: -10 °C/+120 °C
Capacity	1,63 LT	PT: 37 Bar
Prod. Date	01.01.2024	
For used with "Group 2" refrigerants.		

2014/68/EU

9001:2015

ODS Connection

Oil Protective  
Permanent Magnet

33 Bar  
46 Bar

-10 °C +120 °C

As a result of long R&D studies, the new and improved YAG series 5-section oil separation design brings many advantages,

- 99.9% of success oil separation from cooling liquid.
- High performance in all cooling liquid and variable oil viscosities.
- High performance in low, mid and high condensation temperature.
- It does not require maintenance and replacement compared to coalescent filtered oil separators.
- Achieving %5-%8 heat transfer through precise oil separation at high condensation temperatures.
